

# HGA-50 & HGA-530

## Features:

- 8 gallon hopper
- Variable volume & pressure
- Ball-check manifold

## Air powered portable grout pumps

The HGA-50 grout pump is designed for portability while offering a mid-range production rate to complete grouting projects such as piling encasements, machine base stabilization, void filling and more.

The HGA-50 is powered by an external air compressor (not included) and features air cylinder system, ball-check manifold, pressure gauge and wide hopper for easy pouring.

### Model HGA-530 features:

- 30 gal. mixer
- Skid or wheel mount
- 5 HP air motor
- HGA-50 pump

Funnel hopper and pressure gauge

Air cylinder
